

# Bryce Perez

Front End/Full Stack Software Developer

✉ perez.bryce31@gmail.com ☎ (480) 640-8778 🏠 bperez4197-personalsite.netlify.app 🌐 github.com/bperez4197

## Relevant Experience

### **Make A Meme**

Full Stack modern MERN app for making memes

- Create, Read, Update, Delete, and Like memes
- Utilized Modern React with functional components/hooks, React Router, Redux for state management, and Sass for styling/responsive design on the front end, Express and Node for the backend
- Used MongoDB for the database and mongoose to interact with it on the backend
- MVC architecture and RESTful apis

### **Personal Portfolio**

Front End modern React app to display my work

- Utilized Modern React utilizing functional components/hooks, the Intersection Observer Api, Material Icons, and Sass for styling and animating
- Responsive Design with media queries, min/max properties, and flexbox
- Utilized Emails to handle form submission to emails

### **E-commerce Clothing**

Front End React app to sell clothing online

- Utilized React with class components, lifecycle methods, React Router, and Redux for state management
- Utilized Firebase for both authentication and a database for storing user credentials
- Utilized the Stripe library to handle payments
- Utilized Sass for styling

### **Bank Website**

Front End vanilla JS app for a bank and its services

- Became proficient with DOM manipulation/traversal and the Intersection Observer Api
- Built a tabbed component, a slider component, lazy loading images, an animated header, and a modal
- Became proficient with event listeners
- Experimented with multiple ways to do things in regard to browser support

### **BJJ Gear Inc**

Front End vanilla JS app to sell Brazilian Jiu-Jitsu gear

- Full e-commerce store with just HTML, CSS, and Javascript
- Incorporated PayPal's all-in-one payment system
- Experimented with responsive design and DOM manipulation

## Technical Skills
